Subject: background materials for MeOH and Pt briefing at 1:00 today
Attachments: Pt-ToxReview-v39_022912.docx; meoh-iasd-Feb29th.docx; Methanol Fact Sheet 02-29-2012.docx; HPTSalts Fact Sheet 022912.docx

Importance: High

All -

Attached are fact sheets and current working drafts of the Methanol and Halogenated Platinum tox reviews.

We'll use the fact sheets as the basis for today's briefings, and identify and discuss issues related to each of these assessments.

The next step for the Methanol assessment is to provide it to Interagency reviewers for discussion (Step 6) (and a courtesy copy to Agency reviewers). The methanol assessment has been revised based on external peer reviewer comments (notably new PBPK modeling) and the formatting generally followed the Perc Tox Review.

The next step for Platinum is the 2-week redline to Interagency reviewers prior to posting as a final assessment. The Pt assessment has been revised based on external peer reviewer comments and other discussions (notably, resulting in changes in the uncertainty factors and evaluation of the Merget study NOAEL). The Platinum assessment hasn't been reworked yet to follow the structure of the Perc tox review; that is our current plan. The Pt assessment will include two IRIS summaries: one for halogenated Pt salts wherein we derive an RfC; a second for other Pt compounds wherein we do not derive any reference values.

In both assessments, the peer review and other discussions has led to an increase in the RfC and RfD.
